The new sanding experience
with the HUMMEL®

The ergonomic **paddle lever** for more
efficiency in sanding!

info@laegler.com

Since 2020 the **HUMMEL**® is equipped with a newly developed, very robust paddle system.

This new system ensures a completely new sanding experience!

✓ **Comfortable and low-fatigue operating** - due to the ergonomic paddle lever combined with an adjustable quick lift plate and a larger ball-knob.

✓ **Secure fixing and significantly faster separation** of the upper and lower parts of the rod.

Machines built as from 1990 can be retrofitted with either the entire system or only the paddle lever.
