

Overview LÄGLER® - Sanding and Milling Tools

	Carbide-Tools		Ceramic-Tools	Diamond-Tools			
Product	Milling drum HUMMEL®	Milling disc TRIO	Milling disc SINGLE	Diamond sanding disc SINGLE	Scrabber disc, wide SINGLE	Scrabber disc, narrow SINGLE	Milling attachment FLIP®
Picture							
Article number	000.10.42.240 (Set)	900.02.40.100	850.02.40.100	850.02.50.100	850.02.52.100	850.02.53.100	320.01.60.100
Description	Aluminium drum, equipped with carbide indexable inserts, cutting depth adjustment and torx screwdriver	Aluminium disc, equipped with holders and carbide indexable inserts	Stainless steel disc, equipped with holders and ceramic reversible milling cutters	Stainless steel disc, equipped with diamond sanding segment	Stainless steel disc, equipped with PCD-segments (protects the subfloor)	Stainless steel disc, equipped with PCD-segments (more aggressive than scrubber disc, wide)	Complete short attachment with PCD-milling disc and V-belt
Recommended assembly (factory setting)	40 Indexable inserts	3 Indexable inserts, distributed on 3 holders per milling disc (3 milling discs are required)	18 reversible milling cutters, distributed on 6 cutter holders	6 Segments	6 Segments	6 Segments	1 milling disc with 8 soldered cutting edges
Cutting material	Carbide	Carbide	Ceramic	MCD (Mono Crystalline Diamond)	PCD (Poly Crystalline Diamond)	PCD (Poly Crystalline Diamond)	PCD (Poly Crystalline Diamond)
Spare parts / Abrasives							
Description	Carbide indexable inserts	Carbide indexable inserts	Ceramic reversible milling cutters	Diamond sanding segment	Scrabber green (wide cutting edge)	Scrabber black (narrow cutting edges)	Milling disc FLIP
Article number	900.02.45.105	900.02.45.105	000.10.21.101	08.900.010.020	850.06.12.100	850.06.13.100	320.01.61.100
Subfloor							
Screed		✓	✓	✓	✓	✓	
OSB boards and chipboards	✓	✓			✓	✓	✓
Plank floors	✓						✓
Parquet floors							✓

✓ = Recommendation. Due to different conditions on construction sites, the recommendations given here cannot be applied to every application. This overview is therefore only intended to help you choose the right tool.

ATTENTION: Metal objects on the surface must be avoided!

If you have any questions about our machines or the sanding and milling tools, please contact our sales service or our application technology department.
