## The Jubilee HUMMEL®

**50 years of LÄGLER – the parquet sanding machine manufacturer has designed a limited special edition of its flagship for the occasion.**

This year, LÄGLER is celebrating its golden jubilee. In 1956, having made the decision to set up a company on his own, the master engineering mechanic Eugen Lägler laid the foundation stone for today's company, which does business all over the world. His inventions and quality standard revolutionised parquet sanding and made LÄGLER into a world market leader. The most famous development of the Swabian inventor is the belt sanding machine HUMMEL®, 35,000 of which are in use world-wide. On the occasion of the company jubilee, LÄGLER is producing a "Gold Edition" of the HUMMEL®. The edition is limited to 600 units and will be available world-wide from 6<sup>th</sup> June onwards. Every jubilee HUMMEL® will have an embossed LÄGLER GOLD EDITION label and include a golden mini-Hummel, a much sought-after collectors' item among parquet layers and floor layers. The "Gold Edition" will be delivered for all orders received after Whitsun as long as stocks last. The special edition can be reserved through LÄGLER sales representatives. All 600 purchasers of a Gold Edition HUMMEL® will be registered at LÄGLER headquarters and take part in a draw for five FLIP edge and corner sanding machines at the end of the year.
