Texture
in just one pass!

Your TRIO can do this, too! Use it to give your wooden floor a distressing effect!

With the newly developed brushing discs you can extend the field of application of your TRIO for even more jobs! In only one working step and with an extremely effective dust extraction performance, you can add character and give the wooden floor a brushed effect! Simply fit the corresponding brushing disc and run your TRIO as usual - close to the wall - so you can easily achieve a textured floor.

Which brushing disc is right for you?

Nylon

Abrasive nylon bristles for the distressing of softwood floors (e.g. pine, spruce, pitchpine).

Brass

Brass trimming for the smooth distressing of hardwood floors (e.g. oak).

Stainless steel

Aggressive stainless steel bristles for pronounced distressing of hardwood floors (e.g. oak) for an especially rustic look.
